

Sentence p0 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence p1 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence p2 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence p3 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence p4 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence p5 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s0 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s1 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s2 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s3 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s4 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s5 explains how the mixed model parameters are estimated by maximum likelihood.

Sentence q0 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence q1 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence q2 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence q3 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence q4 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence q5 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s0 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s1 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s2 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s3 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s4 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s5 explains how the mixed model parameters are estimated by maximum likelihood.

Sentence r0 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence r1 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence r2 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence r3 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence r4 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence r5 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s0 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s1 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s2 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s3 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s4 explains how the mixed model parameters are estimated by maximum likelihood.
Sentence s5 explains how the mixed model parameters are estimated by maximum likelihood.
